## Theme

The current concept of ESG lacks the necessary measure to capture the enterprises' economic and social impacts as well as the sustainable values created for different stakeholders. Currently, many businesses take the perspective that ESG is mainly to satisfy regulatory requirements. Therefore, Prof Simon S.M. Ho, President of HSUHK, developed a stakeholder-based “Responsible Management” conceptual framework which focuses on three fundamental components, namely Stakeholders, Ethics and Sustainable Values. The purpose of the forum is to discuss how sustainability leadership is being practiced in the business world with a focus on stakeholders' perspective.
